

HACKATHON 3

DAY 3

Introduction:

This marketplace application is designed to connect buyers and sellers of custom ceramic plant pots. It includes features like product browsing, filtering, cart management, and secure payments.

```
"migrate": "node migrate.mjs",
```

Architecture Diagram

- Add a visual representation of the application flow.
Frontend: React → Axios API calls.
- Schema for products, users, and orders.

Migration of provided API

- Provided API to fetch products in my sanity studio and migrate to my sanity dashboard then fetching product sanity into my original product page.

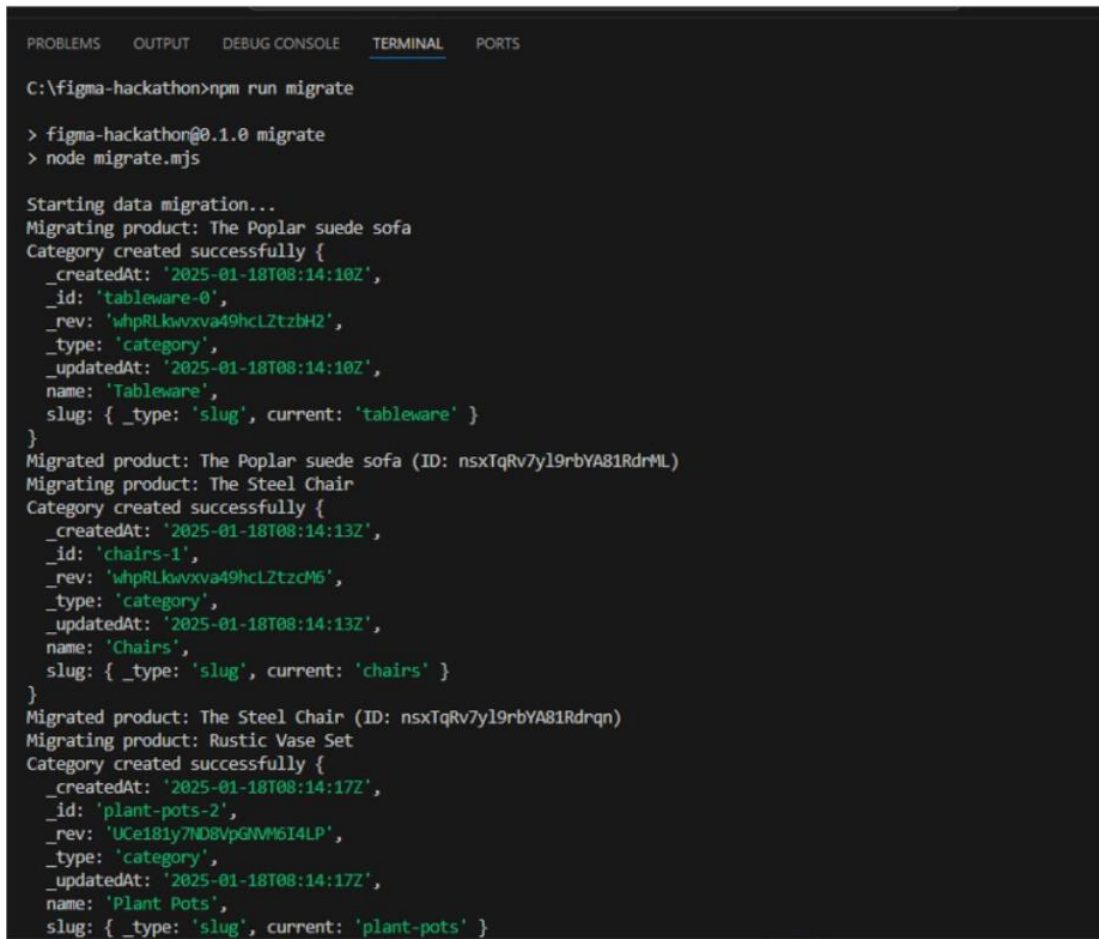

Implementation Evidence:

1. Sanity CMS Dashboard View:
 - ☐ Displays populated products entities.
2. Application Frontend Display:
 - ☐ Renders live data seamlessly on the user interface.

HACKATHON 3

DAY 3

Screen Shot Of Migration:

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS

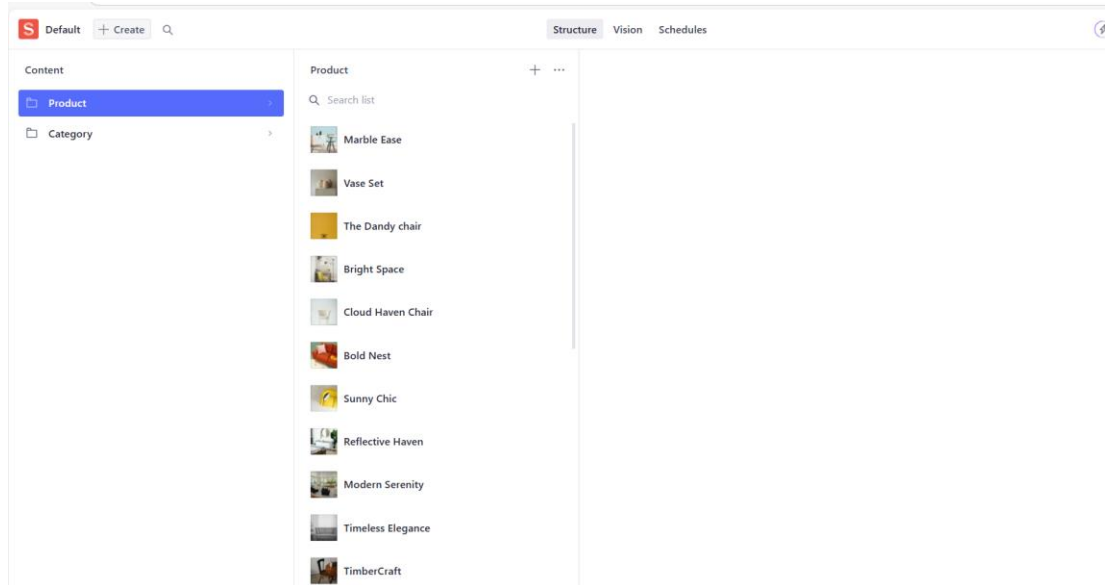

C:\figma-hackathon>npm run migrate

> figma-hackathon@0.1.0 migrate
> node migrate.mjs
